

allow for their vote on the lumber schedule was sufficient. The colloquy was cut short by a recess until 8 o'clock.

Discussion of Cotton Schedule. Mr. Dolliver discussed the cotton schedule, arguing against the cotton tax, and in favor of the cotton tapestry and Jacquard figured goods as affording too much protection to the American manufacturers.

Mr. Aldrich offered an amendment making the rate 40 per cent. ad valorem on tapes and made of cotton valued at \$1 or less per yard, and 60 per cent. ad valorem on goods valued at more than \$1. These rates were adopted.

Speaking on the hosiery schedule, Mr. Dolliver said he wanted to know how earnest and enthusiastic was the effort in the Senate to restore the Dingley rates on stockings. He wanted to know if the higher rates of the House bill were to be restored in conference.

Sen. Scott of West Virginia, offered in evidence a petition from hosiery operatives in West Virginia, expressing fear that if the rates on hosiery were not increased they would lose employment or have their wages reduced.

Mr. Callinger, of New Hampshire, also opposed the restoration of the lower duties, saying that the American manufacturers could not compete with the foreign manufacturers if the Dingley rates are continued in force.

Mr. Smith of Maryland, opposed the high rates, declaring that he knew of no industry better protected than the hosiery industry.

Women Protest.

Saying that he was no more merciful than the hosiery manufacturer, Mr. Penrose said he was willing to follow the chairman of the Finance Committee (Aldrich) in the handling of the tariff bill. He spoke in favor of higher duties on the ground that lower duties mean lower wages to mill workers.

Speaking of the large delegations of women who protested against raising the rates on hosiery, Mr. Dolliver told how they had descended upon the Finance Committee after having called first on the Speaker of the House.

"Most of these women were silk hose, too, I suppose," said Mr. Callinger.

"I have not investigated as to that," replied Mr. Dolliver amid laughter.

A point was made by Mr. Callinger of the fact that many women mill workers had also descended upon Congress pleading for protection.

The Senate took action on a resolution of the Dingley rates, which was adopted, the members of the Finance Committee having promised further consideration of the subject in conference.

Protecting Glove Industry.

Contending that the industry would suffer if the duties on cotton knit gloves were not increased, Mr. Lodge offered an amendment for the Finance Committee, making the duty 50 cents a dozen pairs and 45 per cent. ad valorem on knit or woven cotton gloves valued at more than \$1.20 a dozen pairs, and less than \$8 a dozen pairs, and the duty on cotton gloves valued at more than \$8 a dozen pairs 55 per cent. ad valorem. Mr. Bacon demanded roll call and the amendment was carried by a vote of 41 to 24.

The committee on the paragraph on cotton garters and fabric for suspenders were withdrawn by Mr. Aldrich, and cotton tapes, handings and bindings were included in the paragraph which was then agreed to. Mr. Dolliver and Mr. La Follette opposed the amendment.

Mr. Aldrich explained that the duty was originally placed on cotton duck was intended to cover cloth for sail making, but that in recent years, especially 1908, a finer grade of goods for women's dresses was imported under the same duty.

Woolen Schedule To-Day.

The amendment was agreed to and the woolen schedule was referred to a committee. Mr. Aldrich, in moving to adjourn at 10:08 P. M., said that the Senate would to-morrow take up the woolen schedule.

USED HAT AS WEAPON

Woman Charged with Refusing to Move in Street Car and Assaulting Conductor. Because, as alleged, she refused to get out of her seat on a street car last night when ordered by Conductor J. L. Talley, of the Virginia Passenger and Power Company, Emma E. Talley, colored, was placed in arrest, and then attacked the conductor with her hat. The hat, though a cumbersome affair, was used as a weapon unknown to Amazons of former times, who generally used the claws with which nature endowed them. It was sufficient to cause a charge of assault and battery, and the woman was turned over to a police officer and sent to the Second Station.

It is not an infrequent occurrence with street car conductors that they have trouble on cars that become crowded in asking conductors to move back to make room for the other passengers. And it is stated, the woman generally cause more trouble than the men.

WHITE RIBBON DAY

Daughters of Confederacy Would Erect Monument in Arlington Cemetery.

By the collection of contributions not exceeding 10 cents from each person interested, the Arlington Confederate Monument Association plans the erection on a mound in the center of the Confederate cemetery in Arlington, Va., in full view of Washington City, and in front of the former home of General Robert E. Lee, of a monument to the Confederate dead there buried June 22 has been named as "White Ribbon Day" when Virginia Chapters of the Daughters of the Confederacy throughout the State will make an effort to complete the amount needed for the monument, which is to cost \$50,000.

BANK MEN GO WEST

Richmond Delegates to Attend Convention in Seattle, Wash.

D. E. Mountcastle, president, and Clinton W. Williams, vice-president, of the Richmond Chapter, American Institute of Banking, will leave here next week to attend the annual meeting of the American Institute of Banking, to be held on June 21, 22 and 23, in Seattle, Wash.

One of the delegates from the Eastern cities will meet in Chicago, leaving on a special train June 16. They will be accompanied by St. Paul and Minneapolis on their way out by chapter train. There will be 300 or 400 men from all over the United States at the convention.

The Richmond delegates will stop at San Francisco, Los Angeles, Salt Lake City and Yellowstone Park on their way home.

Roanoke Man in Peril.

Governor Swanson yesterday pardoned Thomas Powell, of Roanoke city, who was serving a brief term in jail for violation of the revenue laws of the State. The man's health is in a precarious condition, he having been taken three days ago from the jail to a hospital.

PROGRESS ON ARMOY

Steel Superstructure Will Rise by End of This Month.

Building Inspector Beck has appointed as inspector on the erection of the new armory at Camp Lee, the contractor who took charge yesterday morning. Brick work is rapidly progressing on the foundation ends and arches for the market-house, and it is expected that steel framework for the superstructure will be here by the end of this month.

The building will rise rapidly. The inspector is employed by authority of the Council Committee on Grounds and Buildings, to represent the city, and is not a permanent deputy to the Building Inspector. Averill and Hall, architects, of Washington, have retained John Draver, of this city, to represent them on the job during the construction.

PURFIES

S.S.S. BAD BLOOD

Bad blood is responsible for most of our ailments, and when from any cause it becomes infected with impurities, humors or poisons, trouble in some form is sure to follow. Muddy, yellow complexion, eruptions, pimples, etc., show that the blood is infected with unhealthy humors which have changed it from a pure, fresh stream to a sour, acid fluid, which forces out its impurities through the pores and glands of the skin. A very common evidence of bad blood is sores and ulcers, which break out on the flesh, often from a very insignificant bruise, or even scratch or abrasion. If the blood was healthy the place would heal at once; but being infected with impurities which are discharged into the wound, irritation and inflammation are set up, the fibres and tissues are broken, and the sore continues until the blood is purified of the cause. S.S.S. is Nature's blood-purifier and tonic, made entirely from roots, herbs and barks. It goes down into the circulation and removes every particle of impurity, humor or poison, restores lost vitality, and steadily tones up the entire system. S.S.S. neutralizes any excess of acid in the blood, making it pure, fresh and healthy, and permanently cures Eczema, Ache, Tetters, Salt Rheum, Boils, and all other skin eruptions or disease. Book on the blood and any medical advice free.
